

More patient insights.  
Better patient care.

Human. Kind.

## Realize your vision for Connected Health.

With our 10+ years of experience in Remote Patient Monitoring (RPM), Trapollo can help plan, execute and manage your Connected Health program so you can spend more time focusing on what you want to do, helping to:

- Produce better patient outcomes
- Increase patient satisfaction and at-home compliance rates
- Reduce costs, readmissions and ER visits

Our goal is to help providers, payors, employers and healthcare device manufacturers accelerate ROI through our end-to-end expertise. To help accomplish that, we offer a broad range of Connected Health technologies, applications and services.

**Secure, cloud-based, connected patient engagement** — Trapollo Converge is our highly flexible, virtual Connected Health platform that lets you extend care beyond the traditional walls of healthcare.

**Program Design & Consulting** — Let us help you map out a plan for success — to scale. Our step-by-step approach is designed to take the complexity out of building, piloting and scaling a successful Connected Health program.

**Logistics & Support** — We are a one-stop shop for logistics, support and device management — freeing up your clinicians and staff to provide and improve healthcare and meet the evolving needs of patients.

As part of the Cox Communications family, Trapollo is dedicated to improving the quality of life across communities. We leverage Cox's power of connectivity to bring technology where it is needed, providing more effective and continuous care.

**Trapollo is proof that a patient-first approach to Connected Health makes it more human. More kind. Let us show you how.**
