

Make Virtual Care a Reality

Enable healthcare delivery remotely.

Our innovative software solutions, logistics, and support services help deploy and scale remote care programs throughout the US.

These end-to-end connected health solutions help serve patients in their day-to-day lives – away from traditional healthcare settings.

CONNECTED HEALTH PLATFORM

Our flexible, enterprise platform delivers integrated patient engagement and care management services to target patient populations in need of remote care, monitoring and engagement.

Our platform care plans are built to manage patient populations with comorbidities including mental health.

LOGISTICS & SUPPORT

Our virtual care specialists partner with you to plan, design, implement, operate and support programs tailored to each target patient population helping to remove the complexities and administrative burden from the clinical staff.

Our nationwide network of service centers and warehouses uniquely positions us to rapidly service and scale programs across the United States.

DEVICE SELECTION & MANAGEMENT

Our team proactively researches, curates and manages one of the most robust portfolios of connected and non-connected devices to meet a wide range of patient populations, budgets and use cases.

We offer many device options to meet the evolving market including low-cost devices, full health kits and BYOD.

Who is Trapollo

Trapollo is a leading provider of connected health solutions and services to enable care delivery outside of a hospital setting in support of the quadruple aim.

As an industry pioneer with over 12 years of experience, we make virtual care a reality for the nation's largest healthcare organizations. Our end-to-end solutions integrate innovative technology, software, devices, logistics and support services together to ensure your program is a success.

In 2015, Cox Communications acquired Trapollo to further their dedication of reinventing the health care journey to a more personalized, frictionless and overall better patient experience while improving the quality of life in the communities we serve.

What type of organizations does Trapollo support?

Trapollo specializes in providing healthcare providers and payers across the United States with end-to-end connected health solutions.

We also offer full logistical and support services to OEM/medical device manufacturers.

How can Trapollo help my organization?

Our connected health solutions help organizations achieve the quadruple aim of:

- Enhancing the Patient Experience
- Improving Population Health
- Lowering Healthcare Costs
- Refining Clinical Experience

With over a decade of experience, Trapollo's experience and proven solutions help enable healthcare organizations to more fully engage with and care for patient populations through virtual care technology.

What solutions do we specialize in?

Our expertise in connected health and full end-to-end solutions includes:

- Program Design
- Connected Health Platform
- Healthcare Logistics
- Medical Device Selection and Management
